Professional Summary

Computer Science Engineering graduate with hands-on internship experience in Java Full Stack Development and DevOps. Passionate about building reliable software solutions, automating deployment processes, and contributing to efficient software development. Seeking an opportunity to apply technical knowledge and problem-solving abilities while growing as a software and DevOps engineer.

Education

Bachelor of Engineering (BE) – Computer Science and Engineering 2021 – 2025
Rao Bahadur Y Mahabaleshwarappa Engineering College, Ballari, India

Core Technical Skills

- **Programming Languages:** Java, Python
- **Query Languages:** SQL
- **Web Technologies:** HTML, CSS, JavaScript
- **Backend / Frameworks:** JDBC, Hibernate, Servlets, JSP Tags, Spring IOC, Spring MVC, Spring Boot, Spring Data JPA, RESTful API Design, Thymeleaf, Swagger & Development, Microservices Fundamentals
- **Cloud Computing:** AWS (EC2, S3, IAM, EBS, AMI, ASG, ELB, ALB, VPC, CloudWatch, SNS, RDS)
- **Operating Systems:** Windows and Linux
- **Scripting Languages:** Shell/Bash Scripting
- **DevOps Tools:** Git & GitHub, Maven, Jenkins, Docker & Docker Hub, Ansible, Terraform and Kubernetes
- **Web Servers:** Apache Tomcat and Nginx
- **Methodologies:** Software Development Life Cycle (SDLC), Agile, Scrum

Professional Experience

Full Stack Java Intern — JSpiders, Bengaluru Nov 2025 – Present

- Developed a Java CRUD web application using Spring Boot and Spring Data JPA, implementing RESTful endpoints for full data lifecycle management.
- Applied core Java, OOP, and the Collections Framework to build efficient, reusable backend components; wrote optimized SQL queries in MySQL.
- Followed Agile/Scrum and SDLC best practices, using Git/GitHub for version control in a collaborative team environment.
- Leveraged AI-assisted tools (GPT, GitHub Copilot, Perplexity) to debug, refactor, and improve code quality and delivery speed.

Certifications

Java Full Stack Internship
JSpiders, Bengaluru

DevOps Internship
JSpiders, Bengaluru

Projects

E-Commerce Backend Application *Java, Spring Boot, Spring Data JPA, Hibernate, MySQL, Razorpay*

- Built a full-featured e-commerce backend using Java, Spring Boot, Spring Data JPA, Hibernate, and MySQL.
- Designed and developed 20+ RESTful APIs across 6 modules – products, categories, carts, orders, reviews, wishlist, and admin management.
- Implemented a Controller-Service-Repository layered architecture to ensure a scalable, maintainable, and testable code-base.
- Integrated the Razorpay payment gateway to enable secure online payment processing and transaction handling.
- Tested all API endpoints using Postman and managed source code versioning with Git and GitHub.

Web Application Deployment to Apache Tomcat with Ansible*AWS, Linux, Git, GitHub, Maven, Jenkins, Ansible, Apache Tomcat*

- Automated the deployment of a Java web application to Apache Tomcat using Ansible playbooks, ensuring consistent and repeatable deployments.
- Managed source code with Git and GitHub and built the application into a WAR file using Maven.
- Integrated Jenkins to automate the build and deployment process as part of a CI/CD pipeline.
- Deployed and managed the application on an AWS EC2 Linux instance running Apache Tomcat.
- Implemented Infrastructure as Code (IAC) practices with Ansible to reduce manual deployment effort and improve deployment reliability.

Parkinson's Disease Detection

Python, StreamLit, Numpy, SVM algorithm

- Developed an ML-based system to detect Parkinson's disease using biomedical voice features.
- Performed data preprocessing, trained classification models (SVM/Random Forest), and evaluated accuracy, precision, recall, and F1-score for reliable prediction.
